

Sales Reporting

Customer Sales Rank Contribution

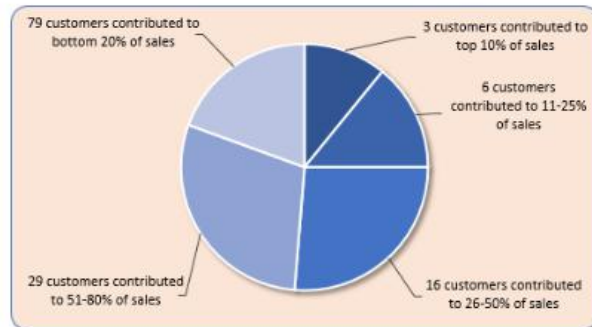

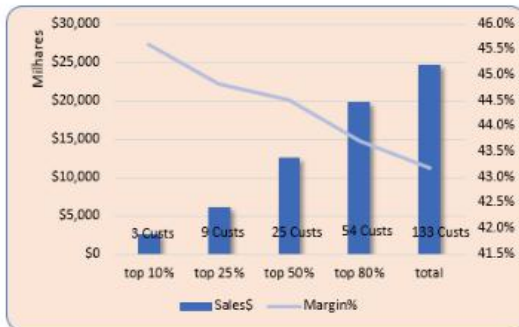

About the report – This report ranks customer sales for a given time period and visually presents who contributes the most to sales. The data is being pulled from the Customer Table and makes use of Sales and Profit flow fields. An intermediary worksheet (PctPivots) is used to provide summary information seen in the graph and pie chart.

Dates used in filtering must be formatted to the same format used in NAV.

Modifying this report – This report can be modified by entering design mode from the Jet tab.
