

## Sales Reporting

### Item Sales Rank and Margin

**About the report –** This report ranks item sales for a given time period and visually presents the items in descending order of sales. It also plots the margins of each to show margin distribution of higher selling items vs lower selling items. The data is being pulled from the Item Table and makes use of Sales and COGS flow fields. An intermediary worksheet (Pivot Chart Source) is used to provide the simple pivot chart used for the graph.

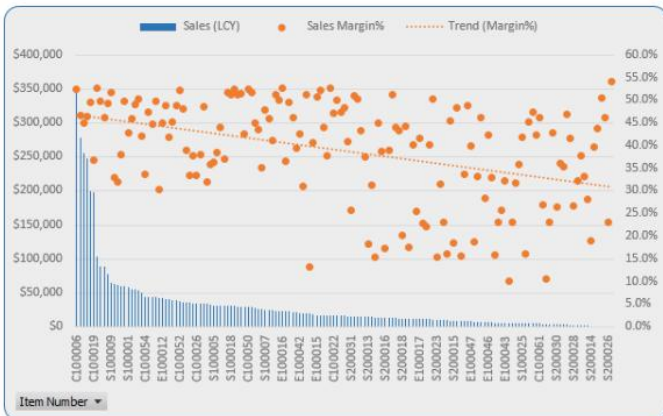

Dates used in filtering must be formatted to the same format used in NAV.

**Modifying this report –** This report can be modified by entering design mode from the Jet tab.
