

Sales Reporting

Open Sales Lines Overview

About the report – This report provides info about open sales order lines. The data is being pulled from the Sales Line Table with some information being brought in from other linked supporting tables. Dates used in filtering must be formatted to the same format used in NAV. A hidden worksheet utilizes additional pivot tables to provide counts to the main worksheet. Counts are calculated using a Named range and the Excel function OFFSET then a ROWS function. These pivot tables are linked to the slicers. However, they do not reflect filter selections made to the primary pivot table.

Modifying this report – This report can be modified by entering design mode from the Jet tab.
