

## Operational Reporting

### Inventory with No Activity

**About the report –** This report provides info about items in inventory that have neither been shipped nor received since a provided date. A list of records from the Item table is retrieved where there is a balance on hand based on some filter(s). Items that have had a Shipment or Receipt, as determined by an entry in the Item Ledger Entry table since a provided date, are excluded from the list.

Dates used in filtering must be formatted to the same format used in NAV.

Manufacturers may want to also look at including consumption quantities and transactions as filters and activity. The tooltip offered for the "No Activity since Date" option is merely a suggestion. The Unit Cost from the Item table is provided merely as information, not as a statement of value. The actual value of inventory is difficult to calculate, particularly depending on your organization's costing method, so it is not provided here.

**Modifying this report –** This report can be modified by entering design mode from the Jet tab.

#### Inventory with No Activity

No sales or purchase activity since: 01/12/18

Report Date 26/10/2018
