1. BI4Dynamics

Out-of-the-box BI solution

All-in-one data warehouse automation for Microsoft Dynamics BC (NAV) built on 10/15 years of BI/Dynamics experiences, covers all Microsoft Dynamics application areas. 1.500+ BI Fields (KPIs) are ready to use from day 1. Sales cube alone comes with 299 measures with 38 dimensions. Comes with a set of Power BI and Excel reports and dashboards.

Solid core for complex data

Data Warehouse provides a single analysis repository for all data sources across your organisation.

Powerful analysis

Data warehouse enables quickly and efficiently analysis without sacrificing any feature as with Power BI.

Internal resources

Using Bi4Dynamics Data Warehouse Automation an IT savvy person can deliver a full data warehouse with a speed of delivery and customization possibilities unseen in the industry.

An incomparable intelligence that supports larger sets of data – millions of rows or terabytes – provides a single analysis repository for all data sources across your organisation, enables quickly and efficiently analysis and is ready to give you meaningful results in a couple of clicks. Overall, quality and reducing cost.

Besides everything is available in different languages and currencies, for greater convenience.

2. SANA E-Commerce

For Microsoft Dynamics 365 Business Central

Sana Commerce is a fully integrated e-commerce solution for Microsoft Dynamics that integrates front- and back-office systems to provide a unified business environment that is much more easily scalable, customizable, and extensible.

Sana Commerce is proud to be the first officially recognized e-commerce app for Dynamics 365 Business Central, offering the benefits of a cloud-based solution without compromising on functionality. Because Sana Commerce integrates with Dynamics 365 Business Central as a plug-and-play extension, you can roll out a dynamic web store for your business faster than ever before.

Sana has several integration benefits, including 24/7 Client Focus, Personalized E-Commerce Marketing, Easy-to-Navigate Online Product Catalogues, Always Real-Time Rich Product Info, Complex Pricing Simplified and Online Order Processing.

SANA MULTISITE FEATURES	ONE WEB STORE	MULTIPLE WEB STORES	UNLIMITED WEB STORES
B2B and B2C ordering environments; internal customer service / sales portal ordering environment	X	X	X
Multilingual support	X	X	X
Multicurrency support	X	X	X
Sell online with multiple brands defined in catalog hierarchy	X	X	X
Sell online with multiple brands represented with unique URLs; each web store has its own record in the ERP and can have custom configurations		X	X
Unique design per brand web store		X	X
Unique product catalog per brand web store		X	X
Unique sales agent and customer data per brand web store		X	X
Shared file system		X	X
Multi-company support in ERP per web store		X	X
Multi-ERP support per web store		X	X

Scalability

With a Sana Commerce web store, you can scale reliably by optimizing to support high order volumes or optimizing web store performance for large product catalogues. This can be done by simply adjusting a few configurations in your ERP and web store. Sana scalability is virtually limitless, as our software provides the freedom to scale up or down according to your needs, so you can always count on optimal performance.

Hosting

It offers Microsoft Azure hosting – one of the most secure and reliable hosting systems in the world. That means 99.9% guarantee on all their provided services.

Real-Time Data and PIM (Catalogue Management)

When your web store is integrated with your ERP system, all the product information, relationships, and categorization in your ERP are instantly available online. Likewise, changes made to the product catalogue stored in your back office are immediately visible in the web store.

Payment Processing

Sana Commerce offers secure, PCI DSS payment processing, payment method variety to best service client needs, and currency support for localization. Because Sana Commerce automates order processing and gives you visibility into your complete buying cycle online – from browse to purchase to return – returns are also completely hassle-free.

3. Tips and Tricks

NAV 2018 Excel Reports vs Jet Reports: A Comparison

So, what are NAV 2018 Excel Reports, you ask? With the Dynamics NAV upgrade, now the Business Manager and Accountant Role Centres will have an option in the ribbon for Excel Templates. When clicked on, users can choose from a list of preconfigured reports that are ready to print from Excel, which includes:

- Balance Sheet
- Income Statement
- Cash Flow Statement
- Retained Earnings Statement
- Trial Balance
- Aged Accounts Payable
- Aged Accounts Receivable

When you select the report you want to use it will open directly in Excel where it can be reviewed and refreshed (if your Office 365 authentication is set-up in NAV 2018). There is also a set of pre-determined filters you can apply to the report in Excel, such as the date. It's safe to think of these like Excel enhanced Account Schedules because, well, that is exactly what they are.

While these new Excel reports are an exciting development in the world of built-in NAV reporting, stand alone reporting solutions have been solving these challenges and more for many years.

Here is high level feature overview of how these predefined NAV 2018 Excel Reports compare to the fast, flexible reporting you've always been able to get with Jet Reports solutions:

	NAV 2018 Excel Reports	Jet Reports*
Report in Excel	*	*
Refresh in Excel	*	*
Change Filters	*	*
Included Preconfigured Reports	7	45+
Add Excel Formulas and Functions	*	*
Apply Dynamic Excel Graphs and Charts	*	*
Customize Layout		*
Drilldown on Transaction Detail		*
Drillback to Transactions in NAV		*
Custom Filters		*
Adjust/Change Template Format		*
Company Consolidations		*
Ability to Build Unlimited Custom Reports		*
Reporting from Multiple Databases		*
Report from any NAV Module, Including Third Party		*
Publish and Share Report in Web Portal		*
Schedule Reports to Run and Distribute Automatically		*

*Product compared is Jet Professional for Microsoft Dynamics NAV 2018

You can see that in addition to the expanded library and drilldown capability, Jet Reports offers the ability to quickly and easily create unlimited custom reports in a flexible format, from any number of NAV companies and entities, directly in Excel, and distribute through a collaborative web portal.

NAV 2018 Excel Reports Income Statement vs. Jet Reports Income Statement

While the new NAV 2018 Excel report templates are a significant improvement in reporting options for NAV users, if you're looking for consistently accurate, adaptable, and collaborative reporting that never needs to be updated or changed as your reporting environment grows or you upgrade NAV, then Jet Reports is still the answer.
