Add-ons Adventure

Continia offers a range of add-ons for Business Central that allow you to improve the way you work, allowing you to save time and money. Each add-on has a unique function for different tasks within a business. Below, we are going to list a few.

Continia Document Capture

This add-on is designed to improve the way you handle a range of documents. Receiving, registering, posting, approving and retrieving documents are streamlined with the option to automate processes.

Continia Expense Management

Handle travel expenses using Business Central or Nav without the need for other systems.

Continia Document Output

Use Business Central or Nav to send documents and create overviews of submitted documents.

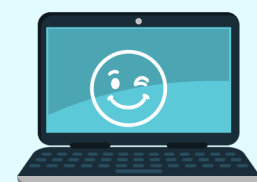

Continia Payment Management

Approving, sending, and receiving payments is streamlined within Business Central.

People Corner Nuno

Nuno is one of our Developers at KE Consulting. He is tasked with working with code and creating and editing solutions for Business Central or Nav. His favourite part of the job is API and third-party integrations. In his spare time he likes bike riding, reading and soap making.

What is a computer's favourite snack?

Microchips!

Business Central 2025 Updates

The Business Central 2025 Release Wave 1 brought a range of new features and updates. Below, we are listing some of the updates that stand out to us.

Application

- Edit Price Lists in Excel.
- Integrate Field Service with Service Management.
- View Item Availability in Field Service Work Orders.

E-Commerce

- More data to import and export for Shopify B2B companies, company locations, and metafields.
- Shopify Connector sales channels are available to activate.

Development

- Performance profiles now have user-friendly client activity descriptions.
- Move data, including tables and fields, as part of refactoring across extensions.
- Web client allows you to open extensions in Visual Studio Code.
- Report layout has new properties.
- Interfaces in AL can now have lists and directories.
- Use JsonObject to read and write YAML in AL.

Electronic Documents

- Simultaneously send documents through a service and email.
- Use posted sales invoices to create e-documents.
- Before processing, you can preview incoming e-documents.

Financial Management

- On documents, you can check total purchase amounts.

Reporting and Data Analysis

- Enhanced analytics for inventory, purchasing, projects, and sales.
- PDF post-processing capabilities in enhanced reports.
- Analysis mode allows you to add fields from related tables.
- Word layouts let you access report and request metadata.

User Experience

- Web client lets you preview PDF attachments.
- Change FactBox pane width.
- User interface enhancements.

KEC Projects Nav + Salesforce BIO

KEC is currently working with a large UK water utility company on building real time integration between their NAV Billing and Collections platform with their new BIO-recycling Salesforce front end. This is the second such project we have done utilising RapidI.

Why shouldn't you use beef and noodles as a password?

It's not STROGANOFF!
